

Personal Statement

Dear PNP recruiter:

I am Yimian Liu (ID: 1717608), a year 1 student in the Department of Electrical and Electronic Engineering, XJTLU. It is my honor to have this opportunity for involving IETE project. And here is my personal statement:

Academic Background

Besides the grade of GPA 4.0 in last semester, I am also a member of Incofo Club, a computer focused club in XJTLU.

I am skilled in self-study. For instance, I had attended the National High-schools Physics Competition and Biology Competition which mainly tested college-level knowledge without special training and was awarded as the third prize of the nation degree and the second prize of the province degree accordingly. Furthermore, I participated in the University Physics Competition in America and was ranked as Accomplished Competitors without any official physical education in last semester.

I have admitted comprehensive ability. The priority of admission of Beijing Normal University and China University of Petroleum (Hua Dong) that I had acquired via their independent admission examinations can prove it.

I have a psychological background. With the interest of human psychology, I have been studying basic psychology knowledge since last November and will attend the standard Psychological consultant examination of Institute of Psychology, Chinese Academy Sciences.

Personal Experience

I enjoy putting my dreams into practice. When I was in junior high school, I assembled my first AM radio on my own. When it came to senior high school, I designed a transceiver with the metal part of desks as its antenna and installed it for the convenience of communicating with friends in class. In addition, a 'smart home' which based on an Arduino Uno 3 and a considerable number of various sensors spread was also built in last semester. 'A person who always have extraordinary ideas' a friend of mine comment me like this.

About IETE

I still remember that when I was a little boy, I and my best friend imagined how exciting entrepreneurship was. However, as I get older, I gradually realize that it is actually not easy as I thought to open a business. In IETE, I hope that I could cultivate the habit of high efficiency and develop my insight of the new industry by learning from young CEOs in PNP.

个人陈述

尊敬的 PNP 招聘官：

您好！

我叫刘宜勉（学号：1717608），是西交利物浦大学电气系的一名大一学生，很荣幸能够有机会申请贵公司与我校合作的 IETE 项目。以下是我的个人陈述：

学术背景

大一上学期 GPA 4.0，目前是我校 Infoco 社（计算机社）管理层的一名成员。

我具备较强的自学能力，高中时曾在短暂准备后参加主要考核大学内容的全国高中生奥林匹克物理竞赛与生物竞赛，并分别获得全国三等奖与省二等奖。在学校还未开设大学物理课程的大一上学期，参加全美大学生物理建模大赛，获得优秀完成奖。

我拥有一定的综合能力，曾获北京师范大学自主招生降分录取资格，以及中国石油大学（华东）综合评价降分资格。

我拥有一定的心理学基础。从去年 11 月开始学习心理学，并将于今年 6 月中旬赴深圳参加中国科学院心理研究所继续教育学院组织的心理咨询师考试。

个人情况

我非常喜欢动手将一些独特的创意制作出来。初中时，独自焊制了一台 AM 收音机。高中时，为了方便上课与好朋友联系，以课桌（金属）为天线改造出基于 Morse 电码的无线电收发器。大一上半学期，通过在宿舍床帘支架与爬栏上布置传感器，利用 Arduino Uno 3 单片机控制，打造出了一款‘智能小窝’。朋友对我评价：具有过人的创造力。

实习愿景

记得小时候，曾与小伙伴一起激动地畅想未来创业的情景。如今随着阅历的积累，也逐渐意识到创业的艰辛，愈发敬佩创业中的企业家们。希望能够在曾经孵化出 Google, Paypal 等独角兽巨头的贵企业中，跟随年轻的 CEO 们，培养自己“高效地做好一件事情”的习惯，加深自己对本行业的理解。
